Renal transplant baseline dermatology risk assessment

Name **RISK LEVEL:**

Hospital No DOB Date:

Transplant History:

Transplant # 1: Date Age Transplant type: CAD LIVE UN
LIVE REL

Transplant # 2: Date Age Transplant type: CAD LIVE UN
LIVE REL

Transplant # 3: Date Age Transplant type: CAD LIVE UN
LIVE REL

Renal history:

Cause of ESRF
.....

Dialysis total duration (months):.....

Type of dialysis / duration: CAPDHD

Rejection episodes:	Transplant #1:	Yes/no
	Transplant #2:	Yes/no
	Transplant #3:	Yes/no

Skin type and UV exposure history:

Skin Type: I II III IV V VI

Country of birth: Resident abroad (high UV) > 6 months:
Yes / no

Occupational UV exposure Yes / No
Occupation:.....

Number of years: ...y
<5 y 5+ y

Recreational UV exposure Yes / No Type of activity:.....
Hours per week: ...h
<20h 20 + h

Sunny holidays (with sunbathing) Yes / No Number:.....
<11 11 +

Chronic UV exposure High* / low outdoor *11+ sunny holidays OR
months occupation OR abroad >6

Acute UV exposure (sunburn)	Childhood no:	none	1-2	3-5	6-
10	11+				
	Adult pre-Tx	none	1-2	3-5	6-
10	11+				
	Adult post-Tx	none	1-2	3-5	6-
10	11+				

Past history of skin cancer and warts:

Actinic keratosis Yes/ No
Details.....

NMSC Yes/ No
Details.....

Melanoma Yes/ No
Details.....

Anogenital Dysplasia..... Yes/ No
Details.....

Viral warts Yes/ No Pre Tx Post Tx
Details

Other medical problems/PMH:

.....
.....
.....

Drugs

Prednisolone	<1y	1-5y	5-10y	>10y
Ciclosporin	<1y	1-5y	5-10y	>10y
Tacrolimus	<1y	1-5y	5-10y	>10y
Azathioprine	<1y	1-5y	5-10y	>10y
Mycophenolate	<1y	1-5y	5-10y	>10y
Rapamycin	<1y	1-5y	5-10y	>10y

Others

.....
.....

Family history:

Renal
Skin/NMSC
Malignancy
Other

Risk Stratification*:

- 1 Skin type V/VI
- 2 I-IV; <35y at Tx
- 3 I-IV; 35-44y at Tx; <5 sunburns
- 4 I-IV; 35-44y at Tx; >5 sunburns OR 45-54y at Tx
- 5 I-IV; >55y at Tx OR documented actinic keratosis/skin cancer
